DEFAULT LAYOUT

This is the default slide layout !

We can control the color of the slide, by setting the `color` option.

If you want a smaller header banner, you can use different `<h# />` tags.

Alternatively, if you do not want a banner, you can either omit a slide title or place everything under the `::content::` slot.

CONTENT SLOT

We use the `::content::` slot of the default layout so that we can center the content entirely in the white area of the slide.

- alpha
- beta
- charlie

Did you notice we changed the color of the slide and the size of the header ?

A perspective view looking down the center aisle of a large auditorium or theater. The seating consists of numerous blue plastic chairs arranged in a grid pattern, facing towards the front. The lighting is even, creating a calm and organized atmosphere.

1 Special Layouts

A dark blue landscape photograph featuring a range of mountains in the background, their peaks partially obscured by low-hanging clouds. In the foreground, a body of water reflects the dark tones of the sky and mountains. The overall mood is serene and minimalist.
